

**The MB series of fireplaces have enough design options to make your new fireplace unique to your own vision and artistic tastes.**

Your choice of Natural Gas or Liquid Propane, the MB36 produces an efficient 18,500 BTU/MB of warmth and comfort. If you have more space, the wider MB42 is the larger version delivering 26,500 BTU/MB with the same artistic style. Standard features include deluxe log set, flat louvers in a Powder coated satin black finish, exceptionally large viewing area with tool less access to the firebox, mV gas control that operates in the event of a power failure, a rewarding choice for any home owner and proudly made in Canada

# MB series

Luxor gas fireplaces offers many optional features to personalize you fireplace, some are simple to change after installation, such as the louvers, or log set, while others need to be factory installed, (see back page) which the people at Luxor would be more than happy to do, call your local sales representative for more detail.

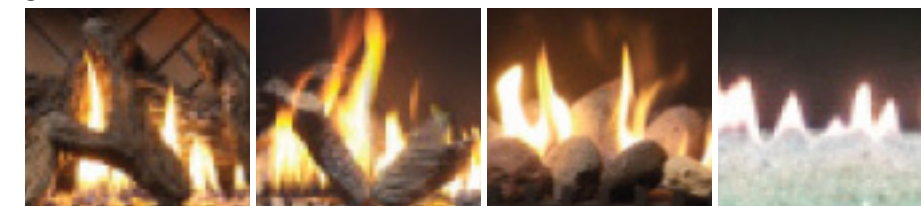

#### SOME OF THE OPTIONAL FEATURES AVAILABLE

Remote control, Accent Lighting & Electronic Ignition w/ battery back-up.

#### LOG OR ROCK STYLES

Luxor also offers a variety of upgrades to the burners, logs media etc., some can be add after installation, some factory installed.

We could call this the never ending options fireplace. Or to put in another way, our engineering and design team like to reverse engineer all of our new improvement to the burners, logs, media etc. when possible, so we are not only designing and improving our products for new customers, but many of our existing products can be upgraded even after installation. So your fireplace never has to get old or out of date.

#### FLAME BACKINGS

Standard flame backing can be upgraded to the Herring bone brick, in either a Boston Buff finish, or the Old Town Red, both backing are reversible, meaning you tire of the traditional horizontal pattern, simple turn the panel around and now you have a beautiful Herring bone brick finish.

Luxor also offer decorative high gloss panels for all of our fireplaces, this wonderfully simple upgrade allows the flame backing to go from a non reflective backing, to a glossing finish, making the flame appear to dance right off of the burner into the room.

#### GLASS CHOICES

Luxor offers a variety of glass door fronts, simply remove the standard door and upgrade to the Mission Glass Door, (no tools required) this elegant door has a diamond cut pattern cut right into the frame of the door, custom door are also available in stainless steel and or high temperature powder coat finish

#### FRONT FRAMING TRIM CHOICES

All of our units come in a variety of fronts and louver styles, decorative outer trims in both 3 and 4 pieces, some need to be factory installed, some can be installed in the field, some even after the unit has been installed. We can virtually custom color any front with our in house powder coating process.

Call or email the factory or your local sales representative for details on any of our standard products or custom finishes, we are here to take your call.
